Impact-safe.

Environmentally friendly.

Independently tested.

Handicapped accessible

The playground surface that gives you peace of mind.

There are many playground surfaces available, but few offer the peace of mind that Soft Landing® does. Soft Landing meets and, in many cases, exceeds the standards established by the U.S. Consumer Products Safety Commission for falls on playground surfaces. It also meets The Americans with Disabilities Act (ADA) requirements for handicap accessibility.

Clean and environmentally friendly

Jolly Gardener uses no recycled material to produce our playground chips. We manufacture Soft Landing from 100% virgin wood at our plants in Maine, Rhode Island and Pennsylvania. Soft Landing playground chips are processed, sized and screened to ensure that it is safe, free of contaminants and clean. As a natural wood product, Soft Landing contains no artificial ingredients or chemicals.

“The playground chips have made a big difference in safety compared to our previous ground cover. We have found that these chips help cushion falls. The children have an easier time walking and running on them. We are very happy with them!”

Meets or exceeds federal safety requirements.

ASTM Tested and Proven

Soft Landing is put through rigorous testing set forth by the U.S. Consumer Products Safety Commission guidelines for falls on playgrounds. Test results prove that Soft Landing meets or exceeds the ASTM* standard for Head Injury Criteria (HIC)**. Please contact customer service for your detailed copy. School systems, recreation departments and homeowners can be assured Soft Landing will help reduce the potential of injury from falls.

“What a great product Jolly Gardener’s playground chips are! We built three new playgrounds in the city of Bath last year — each one is covered with their product. They provide quick and friendly service, and an inexpensive product.”

Installs easily over dirt, sand or grass.

For new installation and upgrades

Soft Landing can be used at a minimum depth of 6 inches, with recommended depths from 9 to 12 inches, depending on the equipment and safety requirements. It can be installed on dirt or sand surfaces – as well as on top of grass to bring older facilities up to modern safety standards.

When you can’t afford to play around

Soft Landing is the safe choice for playgrounds. Call for more information and a free sample.

“With children’s safety a top priority, these chips provide a safe ground cover in our playground area. Last year, we had students in wheelchairs, and one who wore leg braces. After only a few days to settle, the chips provided a truly handicapped accessible surface for these students. Added benefits include the ease with which they are spread and cleanliness as students return from recess. I am glad our playground committee chose these chips for the surface of our playground.”
